

ACOUSTIC WALL CLIP

Series: FTD OMEGA

- Enables separation and isolation of wall lining systems.
- Acts as structure to fix plasterboard.
- Corrects unevenness in structure.
- Reduces space needed for wall structure.
- Complies with acoustic standard ISO 10140.
- Optimal load: 5kg to 25kg per mount.
- Suited for acoustic wall & ceiling panels using Omega channels.

MATERIAL

- Polymer Body: Kraiburg TPE
- Metal structure: Galvanized Steel Dx54d+Z140 with EPDM backing.
- Bowl shaped leveller: Laminated steel DC04
