

GROUNDING GUIDE RAIL

Kitagawa series: FGR-80WS

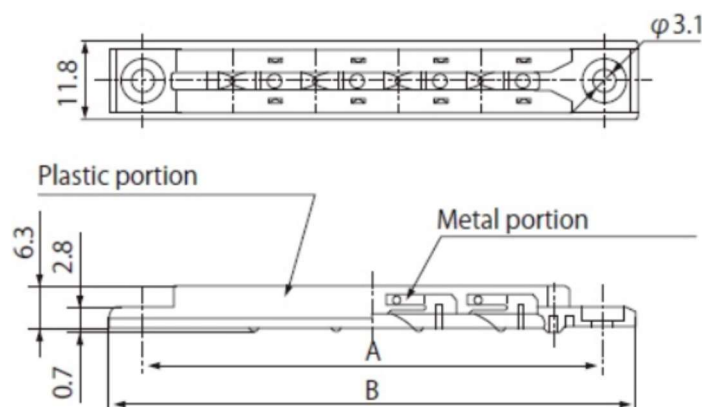

- Provides simultaneous rigid guiding support and continuity of the ground draining circuit.
- Holds cards firmly on designated positions in the package.
- Metal fingers ensure constant contact between chassis and PCB.
- Prevents scratching on contact surface of PCB.
- Contact resistance does not vary in extreme environments.
- Easy to assemble by snap on rivet or screw mounting.

MATERIAL

- Plastic Portion: Polycarbonate (black/UL 94-V-2).
- Metal Portion: Phosphor bronze (Sn plating).
